Detailed Action

Response to Amendment

1. Applicant's arguments/remarks filed on 9/27/2005 regarding claims 1, 3, 5-9 have been fully considered. Claims 2, 4 have been canceled by applicant.

EXAMINER'S STATEMENT OF REASONS FOR ALLOWANCE

2. The following is an examiner's statement of reasons for allowance:

The present application relates to providing a time slot assignment unit in a TDMA transmitter for generating, storing and analyzing assignment control data in accordance with assignment terms received, including the unique functions of:

“storing the set of assignment control data into an entry of said first table, and storing said plurality of address pointers in said second table, wherein said TDMA transmitter includes a data memory for storing a plurality of transmit data, and wherein said set of assignment control data stored in said first table includes an address of a communication terminal, starting address point of each transmit data in said data memory, and a count number of slots assigned to each entry.”

The closest prior art, Kou (US Patent 5,303,234), discloses a central station that generates ACK/NAK data as assignment control data according to assignment terms and detects the location of the address pointers pointed to the assignment control data. However, Kou fails to anticipate or render obvious the above quoted limitations of the present application. This renders the claims allowable.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
